

Supplementary materials

Supplementary Table 1. Examination accuracy of (A) Examination 1 and (B) Examination 2 in Basic scenario

(A) Examination 1

		Examination	
		SideEffect	$\neg$ (SideEffect)
present PD State	SideEffect	95%	5%
	$\neg$ (SideEffect)	25%	75%

(B) Examination 2

		Examination	
		Fail	$\neg$ (Fail)
present PD State	Fail	95%	5%
	$\neg$ (Fail)	25%	75%

Supplementary Table 2. PK Assessment accuracy in Basic scenario

		PK Estimation. result		
		Over	Optimal	Under
present PK State	Over	90%	10%	0%
	Optimal	5%	90%	5%
	Under	0%	10%	90%

Supplementary Table 3. PK Transition Probability when Protocol State is (A) Before Administration, (B) Regimen 0, (C) Regimen 1, or (D) Regimen 2.

(A) Before Administration

		post PK State		
		Optimal	Over	Under
present PK State	Baseline	93%	2%	5%

(B) Regimen 0

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	99.7%	0.15%	0.15%
	Over	0.3%	99.7%	0%
	Under	0.3%	0%	99.7%

(C) Regimen 1

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	99.7%	0.15%	0.15%
	Over	0.3%	99.7%	0%
	Under	0.3%	0%	99.7%

(D) Regimen 2

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	99.7%	0.15%	0.15%
	Over	0.3%	99.7%	0%
	Under	0.3%	0%	99.7%

Supplementary Table 4. PK Transition Probability when the dosage regimen change (A) from Regimen 0 to Regimen 1, (B) from Regimen 1 to Regimen 2, (C) from Regimen 1 to Regimen 0, or (D) from Regimen 2 to Regimen 1.

(A) from Regimen 0 to Regimen 1

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	10%	90%	0%
	Over	0%	100%	0%
	Under	90%	0%	10%

(B) from Regimen 1 to Regimen 2

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	10%	90%	0%
	Over	0%	100%	0%
	Under	90%	0%	10%

(C) from Regimen 1 to Regimen 0

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	10%	0%	90%
	Over	90%	10%	0%
	Under	0%	0%	100%

(D) from Regimen 2 to Regimen 1

		post PK State		
		Optimal	Over	Under
present PK State	Optimal	10%	0%	90%
	Over	90%	10%	0%
	Under	0%	0%	100%

Supplementary Table 5. PD Transition. Probability when present PK State is (A) Optimal, (B) Under, or (C) Over.

(A) Optimal

		post PD State		
		Improve	Fail	SE
present PD State	Baseline	98%	1%	1%
	Improve	99.8%	0.1%	0.1%
	Fail	99%	1%	0%
	SE	99%	0%	1%

(B) Under

		post PD State		
		Improve	Fail	SE
present PD State	Baseline	10%	90%	0%
	Improve	10%	90%	0%
	Fail	0.2%	99.8%	0%
	SE	99%	0%	1%

(C) Over

		post PD State		
		Improve	Fail	SE
present PD State	Baseline	10%	0%	90%
	Improve	10%	0%	90%
	Fail	99%	1%	0%
	SE	0.2%	0%	99.8%
